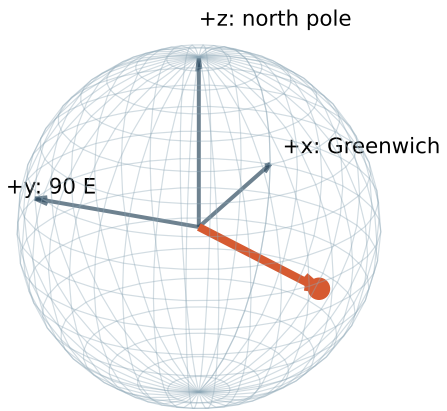
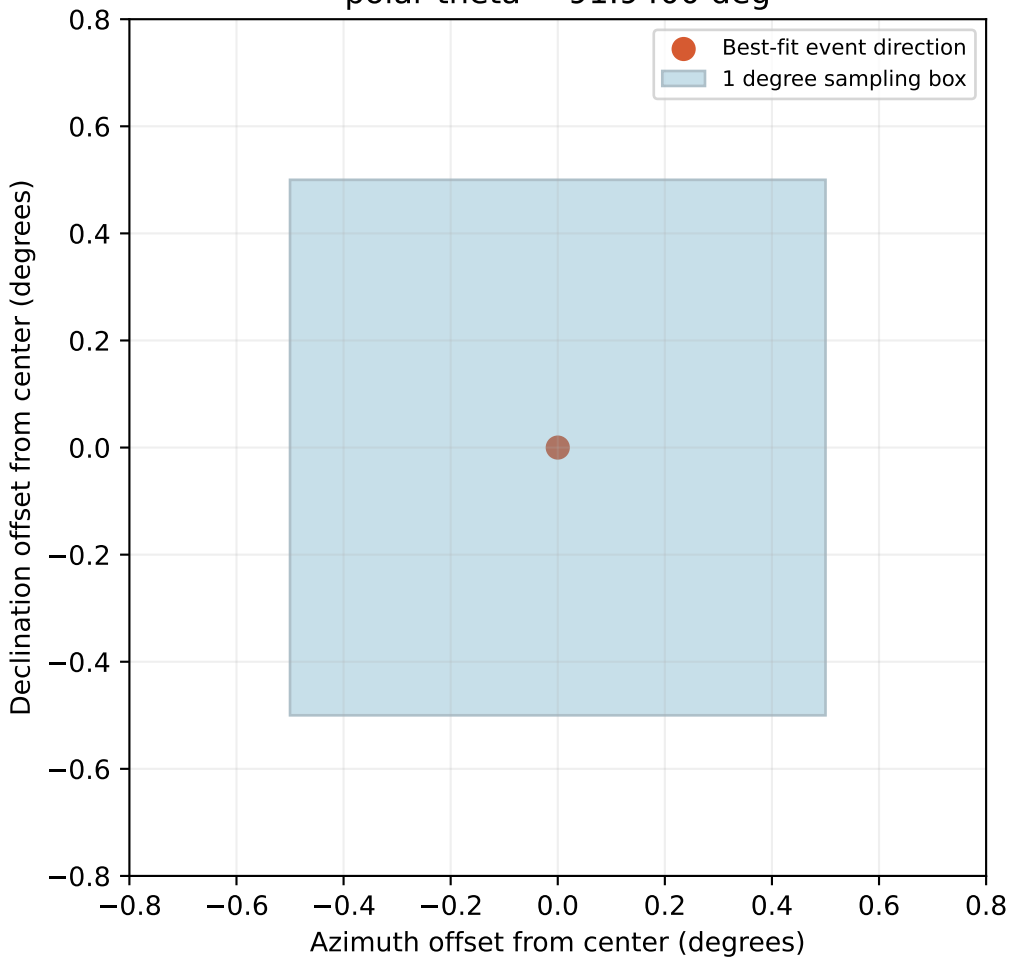
IC110514A | 2011-05-14T01:32:22.654109000 UTC

Source direction in Earth-fixed axes



phi = 243.9235 deg; dec = -1.9400 deg
polar theta = 91.9400 deg



RA - GMST (IAU2006) convention; vector points toward source.
Box is the GWAK sampling choice, not the event localization uncertainty.
